SUMMARY

Experienced Backend Engineer with over **5 years** of expertise in designing and building **scalable, high-performance applications** using **Java, Spring Boot, Node.js, and Microservices**. Strong background in **cloud computing (AWS, GCP), DevOps, security best practices, and CI/CD pipelines**. Proficient in **REST API development, event-driven architecture (Kafka), and containerization (Docker, Kubernetes)**. Adept at applying **SOLID principles, TDD, and Agile methodologies**. Experienced in industries such as **Fintech, Oil & Gas, and Real Estate**. Passionate about building efficient backend systems and mentoring teams to deliver high-quality solutions.

TECHNICAL SKILLS

- **Programming:** Java, Spring Boot, Node.js, Python, TypeScript, JavaScript, PHP
- **Backend & Microservices:** REST APIs, Kafka.
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Google Cloud, Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions)
- **Security & Optimization:** OWASP security principles, performance tuning, API gateway, rate limiting
- **Other Tools:** Git, Agile/Scrum, Jira, RabbitMQ, Redis.

WORK EXPERIENCE

Software Engineer (*Hybrid, Lagos*)

eTranzact Plc. - Fintech (*December 2023 - Present*)

- Led the development of a **Central Card Management System** (virtual debit card in a multi-tenant environment), achieving **99.9% uptime**.

- Built a **Central Notification Service System** using **Kafka**, reducing transaction delays by **60%** through event-driven architecture.
- Improved **API security and scalability** by implementing authentication and rate-limiting strategies.
- Integrated **AWS services (S3, Lambda, EC2)** for seamless backend scalability and reliability.

Software Engineer (*Remote, UK*)

EBIS Tech - Oil & Gas (*August 2022 - December 2022*)

- Developed a **gas delivery nomination system**, increasing operational efficiency by **40%**.
- Implemented **real-time data streaming** for Power BI integration, reducing manual reporting time by **50%**.
- Designed a **robust database strategy** for accurate gas volume calculations (**99.9% accuracy**).

Enterprise Architect (*Remote, Lagos*)

Payvessel - Fintech (*January 2023 - April 2023*)

- Engineered a **scalable system architecture**, increasing system efficiency by **70%**.
- Led CI/CD pipeline implementation, reducing deployment time by **50%**.
- Enhanced backend security measures to prevent vulnerabilities and attacks.

Backend Engineer (*Remote, Enugu*)

Samtechnet - Telecom (*June 2018 - February 2020*)

- Led a team of developers in building a **SIM hosting server**, improving uptime by **80%**.
- Introduced **Agile methodologies**, increasing team productivity.
- Established a **continuous integration and deployment (CI/CD) process**.

EDUCATION

- **B.Tech in Maritime Management Technology**
Federal University of Technology, Owerri (*2016 - 2021*)
- **Master's in Information Technology**
University of Lagos (*2024 - 2026*)

CERTIFICATIONS

- AWS Certified Developer - Associate (*In view*)
- Software Engineering (Stutern Accelerator Program)

PROJECTS & CONTRIBUTIONS

- **Open-source contributor:** GitHub (Java, Node.js, API Security)
- **Developed and maintained fintech APIs** with over **100,000 daily transactions**
- **Implemented cloud-based serverless functions** for high-performance systems

VOLUNTEER EXPERIENCE

- **Mentor & Trainer:** Guided junior developers in backend best practices, cloud deployment, and API security
